HF Username: Hertug

UID: 1965354

Service/Product: <https://hackforums.net/showthread.php?tid=4787321>

Open Scam Report Claims: None

Amount: \$50

### Details:

User was buying CS:GO skins for 70% of their marketplace value. I had 'sold' him an AWP Asiimov and two AK-47 Redlines totaling to \$51, but we agreed on \$50. Afterwards, the user told me that he'd pay me within 5 minutes, but that never happened. I waited 20 minutes before messaging him again on steam, only to find out that he had blocked me. After I edited my post on his thread, he closed it and blocked me on Hackforums also.

I'd like a refund of my items or to just be paid the \$50..

Thanks, I appreciate your support. I really didn't think that he'd scam me, and especially be so obvious that he did it..

Thanks, Jesse. I appreciate your support, although I highly doubt that I'll be getting my skins back, sadly.

Sorry this happened to you bro. Hope this gets resolved soon.

Thanks. I know for a fact that Hertug has seen this thread because he closed his 'CS:GO boosting' service. It's such a shame that he's still around.
