Google and YouTube would be your best mentor in this case.

Teach yourself and eliminate all risks of getting rekt OP.

Yeah, except asking for FREE mentor- skid or not = getting rkt by a bigger skid. Unless you are VERY lucky TBH.

The only thing you are is a fucking skid. I could give you a unix executable vulnerable to the most basic type of overflow and you would have no idea what to do with it. Prove me wrong "l337"
