Thread: [nodistribute.com, scan4you and other shitty mult Virus Scanners.](#)

Arcanine 4th Account - April 20, 2015, 6:04 pm

You see all these "awesome free scanners" you all use? They're total shit!

Guess why?

They aren't using UPDATED Anti viruses.

How do I know? Go Crypt a file using any crypter and scan it on nodistribute.com, scan4you... If its FUD. Go download/buy anti viruses and check if its FUD. [lol it wont be.]

So yeah. Only good scanner that actually uses there own Servers is RazorScanner. GG.

BahNahNah - April 20, 2015, 6:07 pm

are you sure you are not mistaking scantime fud for runtime fud?

(Apr 20, 2015 06:07 PM)BahNahNah Wrote: [\[CITE\]](#) are you sure you are not mistaking scantime fud for runtime fud?I am 100% sure I am correct. I haven't mistaken anything.

Cecilia - April 20, 2015, 6:09 pm

I'm interested as to whether ReFUD Me is using an API.

Uses 35 AV's, not sure of scan4you right now.

The Scarabian - April 20, 2015, 6:09 pm

Hey, just because it shows up as scantime FUD doesn't mean it's runtime FUD.

Jason Voorhees2015 - April 20, 2015, 6:11 pm

Symantec claims anti virus software is dead anyways. So, I guess were just supposed to make an educated guess.

[nodistribute.com](#) - 11/34

[refud.me](#) - 12/35

[Fuckingscan.me](#) (uses scan4u api) - 12/29

[razorscan](#) - 23/59

Edit: Just compared fuckingscan.me with razorscan. The antivirus results where the same.
