Thread: [Skype Image Finder](#)

SIM-2137258 - April 21, 2015, 5:25 am

Hello, I give you a small program that retrieves the avatars of Skype users by entering their usernames and also allows you to save.

I also give you the source code.

[VirusTotal](#) (7/54) I don't know why :/
[Download](#)

Source :

Code Public Class Form1

```
Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
    PictureBox1.ImageLocation = "https://api.skype.com/users/" & TextBox1.Text & "/profile/avatar"
End Sub
```

```
Private Sub Button2_Click(sender As Object, e As EventArgs) Handles Button2.Click
    SaveFileDialog1.FileName = TextBox1.Text & ".jpg"
    SaveFileDialog1.ShowDialog()
    PictureBox1.Image.Save(SaveFileDialog1.FileName)
End Sub
```

```
Private Sub Form1_Load(sender As Object, e As EventArgs) Handles MyBase.Load
    PictureBox1.ImageLocation = ("https://api.skype.com/users/echo123/profile/avatar")
End Sub
```

```
Private Sub TextBox1_KeyPress(sender As Object, e As KeyPressEventArgs) Handles
TextBox1.KeyPress
    If e.KeyChar = Chr(13) Then
        TextBox1.Multiline = False
        PictureBox1.ImageLocation = "https://api.skype.com/users/" & TextBox1.Text & "/profile/avatar"
        TextBox1.Multiline = True
    End If
End Sub
End Class
```

Thanks man! Amazing work bro. but the layout could be better like themes.
But its all about the program :).

Why would you need a theme for a program as simple as this? Do you need pixie dust on all the

shit that you own? ???

You should edit you code to this because your calling a function if there is a username or there isnt a username :) I hope you know what i mean ?

```
Code If Textbox1.Text = "" Then
MsgBox("Please enter a Username")
else
Try
PictureBox1.ImageLocation = "https://api.skype.com/users/" & TextBox1.Text & "/profile/avatar"
Catch ex as Exception
MsgBox("Error: " & ex.ToString)
End Try
End if
If you have any questions feel free to pm me :)
```
