You must be Ub3r to post threads in the Non-Free Accounts section.

Then it must be an Ub3r and 3p1c only section now.

I've looked, the user he's talking about is Ub3r AND 3P1C, he must have just not noticed.

That's what I wanted to point out. 3P1C is a membership that is separate from Regular/L33t/Ub3r. Likely they have their 3P1C userbar as their display group but are still an Ub3r member.

You must be Ub3r, the users you saw are Ub3r who also bought 3P1C hence why they were able to create threads. You won't get a better answer.

That's exactly the case, probably just confusion on the part of the OP.

No problem bud, next time you have question check the HF Help Documents, if you don't find your answer in there then you most likely will find it in my thread:
