Website and other Offers coming soon !

Accoy - April 21, 2015, 11:09 pm

You have 3 posts and your selling a RAT for Android devices and 0 rep....

You also are selling this in the wrong section.

howard2525 - April 21, 2015, 11:12 pm

Especially most of these features can be used using Androrat, its not worth the price.

Xandro - April 21, 2015, 11:36 pm

@Accoy Bro Everbody starts from 0 so am new here and trying to sell my stuff. may be ill become a leet or respected member here after spending the time and sale my stuff that can only give me my respect by providing best support out there.

@howard2525 Yes bro Androrat can do it ! but with my rat u can setup your own server based management

Androrat works with Port Forwarding and Detects with Most of the Antivirus. but my rat works with any free paid servers its like mobilespy but you can setup the thing with your own ! NO need of Port Forwarding etc soon ill update some more features like password grabber live screening etc.

Or you could easily control there android device from a website

My simple tutorial shows how easy it can be to turn any android into a bot slave

<https://hackforums.net/showthread.php?tid=4788434>

At that point you can have there device do just about anything they can do..

All 100% free and no SQL or database installation needed

IlravangerII - May 3, 2015, 9:50 am

Lame. Go back to work on it.
