Thread: [How can i block DDoS attacks?](#)

FuNct1OnaL - April 22, 2015, 2:02 am

Hello,

I have 3 servers (HP DL360 gen9), and i want block DDoS attacks.
How can i do that?

In my servers i hosting clients hosts, and i want they be protected in my servers.
So.. How can i block DDoS attacks?

Thank's!

will this is not enough information i need to know :

- 1- what operating system u use !
- 2- do u host web-sites on it !

this can help to make tutorial for how to protect your self from DDos attacks

Both are necessary before any useful information can be given to you besides sign up for cloudflare
?

This is a very broad question and a difficult one I answer. What kind of attacks are you looking to stop? There are a plethora of different types of DoS attacks these days

Mr Armadillo - April 22, 2015, 2:40 pm

this all depends on how flexible you are in terms of excluding certain ips and or limiting botnets.
