Thread: [control panel ??](#)

somolooo - April 22, 2015, 8:09 am

Hello guys i hope that everyone is ok

I'm posting this cause i struggle a lot with a website to find it's control panel

i already have admin login and password thanks to sql injection aka easy hack but i can not find it's cpanel if any one can do it for me or show me the methode i'll be glad

the site is : [esisa.ac.ma](#) sorry i can't post urls

devil6 - April 22, 2015, 8:42 am

<http://esisa.ac.ma:8080/>

Will get you the Apache Config page? (Unsure if it is actually called that, but that is the name i have decided to use)

somolooo - April 22, 2015, 12:03 pm

devil6 yes i confirm that (i get the apache page) not the cpanel page

devil6 - April 22, 2015, 6:07 pm

Not sure if they have a cpanel,

this is their host <https://www.heberjahiz.com>

based on a quick google translated look through the Tech support section it sounds like cpanel is an option that can be ignored

You said you had admin login, try it on the members area on the hosts page

Or try to connect via FTP. (Would be advisable to be behind a decent VPN if you try that though)

also looks like they may have RDP enabled for windows servers, that site is running off of IIS. so it's a windows host
