Thread: [502 Bad Gateway problem](#)

PLTomislaV - April 22, 2015, 11:55 am

Sorry if i posted this tread in the wrong section. still newbie in here ;)

I have a problem when im using HF on PC it's ok but on Mac it gives me very often 502 Bad Gateway error. How to fix it ?

ntoskrnl.exe - April 22, 2015, 12:00 pm

Because it is Mac.

Buy real PC to solve your problems.

PLTomislaV - April 22, 2015, 12:05 pm

Haha dude im serious ;D not joking. can somebody help ?

Premortal - April 22, 2015, 2:12 pm

All the threads from the past that I'm looking at that bring up this same issue have said that it ended up going away after not very long. I'm sorry I can't be of more help.

Bibikins - April 22, 2015, 5:42 pm

Quote:The 502 Bad Gateway error is an HTTP status code that means that one server received an invalid response from another server.

I don't think this is related to the operating system you're using.

Here are many of the things you can do. Use another browser such as Firefox, or Google Chrome, and see if your problem still persists.

Clear your browser cache

Restart your modem

Clear cookies

Is it the same IP on both systems?

Which browser do you use with your Mac?

Do you have any browser plugins that cache content to accelerate browsing?
