Thread: [\[C# & VB\] SimpleCryptography class - Simple byte and string encryption/decryption](#)

BahNahNah - April 24, 2015, 2:32 am

Download (C#): [Pastebin](#)

Download (VB): [Pastebin](#) (Untested)

i will convert it to VB if people want it.

Example:

This code

```
Code string start = "Hello world";
```

```
Console.WriteLine(start);
```

```
string enc = SimpleCryptography.EncryptString(start, "pass");
```

```
Console.WriteLine(enc);
```

```
string ret = SimpleCryptography.DecryptString(enc, "pass");
```

```
Console.WriteLine(ret);
```

```
Console.ReadLine();will output
```

```
Code Hello world
```

```
j+BWO1y+2mys0yfhJK/47g==
```

```
Hello world
```

This is the VB section, so yes, convert it to VB (not that it is needed, really. Code is pretty simple. But yeah my point is this is the VB section not C#) or post in the C# subforum.
