Haha wow nice, you managed to deface 24 absolutely pointless sites!

Quit acting like a badass, you have no idea. Hack something that's actually worth posting a thread about.

How are these sites pointless?

"Firmstep has launched a new service called AchieveCity, a Web-based government platform powered by the Drupal distribution OpenPublic (developed by Phase2 Technology) and hosted in the Amazon EC2 environment."

I would also love to see some sites you've defaced that aren't "pointless", since you're the "expert" right?.

I don't deface sites because I'm not a fucking muslim skid.

Feyzi - April 24, 2015, 8:35 pm

Looks bad ass, you giving away your site template?

asm-99 - April 25, 2015, 12:46 am

Nice index.....~

Keep it up.

Th3PonyWizard - April 25, 2015, 3:08 am

You hacked 2 sites and shitted all over their sub-domains. Absolutely astonishing.

dotslash - April 25, 2015, 3:40 am

you call this hacking , whatever man , good job ...

lulzcat - April 25, 2015, 3:59 am

Absolutely lost my shit at "Security is an illusion" hahaha saw it coming from a mile away.

P0pz - April 25, 2015, 5:12 am

GG OP, pointless defacement.

Even your deface page says that you defaced these site only because of their poor security. This isn't hacktivism, and this isn't security awareness. You defaced this for fun only.

I shelled 2 sites and rooted the server.

Well to be honest this is security awareness, since we do help people restore the site after we/i deface it. The admin of the site contacts me on facebook, and we/i explain the vulnerability and restore the site for him. So this is security awareness, and i do have fun at the same time. So you were right about the fun part though.?

This guy also had a 2011 kernel so it was pretty easy to root the server.

Then why deface? Just tell the admin about this vuln.

Thehackerguy1 - April 25, 2015, 6:18 am

A stupid skid who found a weak website hacks it, and makes a statement "Security is just an illusion" lol. OP you are bullied by kids.

Contacts you on FB? Well you're a smart child aren't you? I hope the admin contacts authorities and they request all information from FB regarding your, Page / group / identity

You're clearly not doing this to help them, The message on your deface even states... Your data is now ours or some shit. I don't usually wish for anyone to get v& but for people that are stupid enough to request to be contacted on FB AFTER defacing someone's site deserves it.

defacing is dumb-dumb ... other people worked hard for that sites ... with that you demonstrate that you are a stupid script kiddie

Well if they worked so hard for that website, then why is it vulnerable to certain exploits. I don't think you know anything about defacing do you?. It's not like i delete any files or deleted their backup. The only thing i changed is the index page. The only thing they need to do is to change the index page once again, and the site will be okay. So if they really gave a damn, they would have done it ages ago. Self explanatory. I already emailed the owners on how to recover the site.

Much sp00ki, Very h4x0r.

Try going after unique sites, not the same two's subdomains.

Holy fuck why is everyone getting so mad at OP for messing with shit?

Who cares if you think defacing is bad, his page is bad or he's a skid?

If you don't like it, just move the fuck on.

Yeah, this section is mostly kids having fun, but holy shit you friendly people are the fucking same, except you aren't kids.

Look at mobile_xt for example.

Fuck.

First off I rarely reply in threads. I have no time for HF drama but if you think I give a fuck what anyone thinks about me, you are wrong. Haters are gonna hate, that's what they do. You see in the 4 years I've been on HF I learned that HF is not much of a "hacking forum" as much as it is a Lounge for social media kids. HF will always be the first place kids go when it comes to hacking. Not knowing a thing about it but curious how its done, that's why you see so many questions in this section.

As for me, I'm not Muslim, nor a child. I'm nothing more then an old washed up hacker from the 90's

having fun. Here's an old thread.

I've been in this trade for almost 20 years and I have nothing to prove to anyone. Hacking is a hobby to me, like fishing,sports ..ect Nothing more the pure entertainment. What I post on HF is what I'm currently reading/exploiting/sharing. Most of it is basic public stuff but I try to explain it so even the "n00b" can benefit from it. And if that bothers you, I'm sorry, I'm not here for you, I'm here because there is nothing on TV and I'm bored. :P

anyway.....

anyway.....Yearly reminder you're the cancer of HF. It's not a hacking forum strictly because of you. You solely ruined a large portion of this section. Your tutorials support laziness, succumbing to fast reward-low effort, and ultimately very anti-hacker spirit like. You're thrice as old as me, so telling you to grow up is redundant. When will you leave?
