Thread: [***Ultimate Malware Guide***](#)

NukeHV - April 25, 2015, 7:57 am

Hello my name is NukeHV and i'am a security expert, I have been a security expert for almost 5 years. I have a very good experince when it comes security and malware removal. I currently have 5 certs.

Malwares
RATS

Rats can be annonying and not be peacful everytime you surf the internet.

WORMS

Worms also known as EBOLA can spread over your files virus.

Scareware

Scarewares can scare your ass sometimes like Norton or Antivirus 2011 pro, Both of these are very good software.

Rogue

Fake software that pretends to be AVAST.

Rootkits

They can hide and sneak, They sneak into your pc then they go to keyboard, Also known as keyboard virus.

Polomorphic file infectors

These type of malware is remote control hacker can attack whenever they want to Usually steal your web browser cookies.

Keylogger

Keylogger, They confusing the mouse so it might jump around a bit.

Adware

Adware, Very hard to remove. Even after format they can still be left.

How do i know that i'am infected with these kind of viruses?

Good question!

CD ROM

Ur CD rom can go in and out. Like they are fucking each ohter you know what i mean?

Popups

You recive popups on the screen asking you to pay for a technican to clean it up for you.

BSOD

compyter go bsod for time and time, Fixing MBR can solve this problem.

Slow

Computer can be slow, VERY slow eh? Run a couple of scan and everything should be fine.

Compromised

All you accounts are getting hacked, Run malwarebytes antivirus and you should be good.

How do i clean these stuff from my PC?

Cleans all kind of stuff of malwares.

Malwarebytes-Antivirus : malwarebytes.org/mwb-download/

RAT cleaner, Cleans RAT

Adwcleaner-Antivirus : bleepingcomputer.com/download/adwcleaner/

An ohter RAT cleaner

Junkware Removal Tool-Antivirus : bleepingcomputer.com/download/junkware-removal-tool/

How do i protect my self from these viruses?

AVAST Antivirus portect from these threats always have a antivirus program.

Dont download hack packs from HF or youtube.

NukeHV - April 25, 2015, 8:21 am

Maybe make AV that uses md5 hashes?

Klavato - April 25, 2015, 12:35 pm

You didn't spell experience right, so i'm very doubtful.

Orchid - April 25, 2015, 3:39 pm

Wouldn't recommend using this if you have a rootkit, rat, or anything different than adware.

inursia - April 25, 2015, 3:43 pm

Agreed on not downloading hack packs. Malware playground...

UnPluggedToaster - April 25, 2015, 6:25 pm

I am trying not to be a douche, but learn a bit more before you start typing. Norton is the worst AV ever made. Most "Routers" these day's have there own firmware so when rebooted it loads itself. So please close this thread.

Tha Sneak - April 26, 2015, 12:05 pm

NukeHV - April 29, 2015, 1:13 am

I'am not a troll, Infact i'am a human.

Orchid - April 29, 2015, 11:39 am

Wait, AdwCleaner won't get rid of a rat (has like a 4% chance).

OP the tools you linked are for Adware and some PUPs.

NukeHV - April 29, 2015, 11:55 am

(Apr 29, 2015 11:39 AM)Orchid Wrote: [\[CITE\]](#) Wait, AdwCleaner won't get rid of a rat (has like a 4% chance).

OP the tools you linked are for Adware and some PUPs. Ah ok, So what is a RAT? And what is a Adware?

EDIT i got it BING helped me. For anyone else here who wants to know what a RAT is.

Rats are various medium-sized, long-tailed rodents of the superfamily Muroidea. "True rats" are members of the genus *Rattus*, the most important of which to humans are the black rat, *Rattus rattus*, and the brown rat, *Rattus norvegicus*. Many members of other rodent genera and families are also referred to as rats, and share many characteristics with true rats.

Rats are typically distinguished from mice by their size. Generally, when someone discovers a large muroid rodent, its common name includes the term rat, while if it is smaller, the name includes the term mouse. The muroid family is broad and complex, and the common terms rat and mouse are not taxonomically specific. Scientifically, the terms are not confined to members of the *Rattus* and *Mus* genera, for example, the pack rat and cotton mouse.
