Thread: [Web server is returning an unknown error](#)

HACKED BY Unreal - April 25, 2015, 4:32 pm

Anyone else having this issue atm, or is it just me?

It happened just now for around 15 seconds, then it happened for like 3 minutes a few minutes ago.

EDIT:

Underd?g - April 25, 2015, 4:33 pm

Yeah I'm getting it as well. It'll be nothing.

Fr?sh - April 25, 2015, 4:41 pm

It is probably Omni doing something

And yes, everyone gets it

Thats a nice looking IP you have there. ???

Innixion - April 25, 2015, 4:58 pm

Happens to me every single thing I click haha, have to keep refreshing!

PureLifeCoding - April 25, 2015, 5:00 pm

Same here man this is annoying as fuck. I have to refresh like 10 times to load anything.

ViN - April 25, 2015, 5:02 pm

Yes, seems like a site-wide problem. It only lasts a couple of seconds every time it happens though(which is every couple of seconds). I'm sure it will be dealt with soon.

Mr. WAVES - April 25, 2015, 5:07 pm

I would like if an admin delete all my duplicated (and closed threads). I already deleted one (per 24hours). Sorry. It was because of the error "Web server is returning an unknown error".

?Saadi - April 25, 2015, 5:27 pm

After refreshing HF for about 10 minutes, i finally got here to post.

This is annoying.

I agree, but I guess we have to be patient until Omni fixes it.

Fr?sh - April 25, 2015, 5:39 pm

Jesus it's still doing it

Makes me sad

Enzio - April 25, 2015, 5:40 pm

Damn, I have had this for the past 30min or so xD. Finally I can do some shit lol. Was it Omni doing some stuff or what?

Mr. WAVES - April 25, 2015, 5:42 pm

Why do I see index2.php ?

Rice - April 25, 2015, 6:10 pm

Rest in peace, hackforums.net. :(

Mutes - April 25, 2015, 6:10 pm

Looks like it's fixed now. I was getting so bored.

TH.

Pulseeeey - April 25, 2015, 6:12 pm

It looks like he's trying to apply SSL, since I am being redirected to https and index2.php

Rice - April 25, 2015, 6:12 pm

I was joking around, haha.

HotTube - April 25, 2015, 6:20 pm

I got it too for a while along with a messed up index2.php so I clicked View New Posts and it's fine.

hey0 m9 rekt - April 25, 2015, 7:09 pm

Same thing's happening to me, I have to refresh 10-20 times before I can load a page. Took me a half hour to post a thread in the eBook Bazaar ?

ChingChingLee - April 25, 2015, 7:18 pm

Just another DDOS attack ladies and gents. Nothing to see here.

Mathew425 - April 25, 2015, 7:54 pm

It looks like everything is working again.

Well I'm still online. Try another attack method maybe?

Ummm... thanks? I have no reason to hide it lol.
Hahahahaha you're funny kid. ?

SIM-1676753 - April 25, 2015, 7:56 pm

Maybe it wouldn't be so bad if you all didn't refresh 20x a second.

Gary - April 25, 2015, 7:59 pm

I thought I was going to die if HF didn't get back online.

Oliver Sykes - April 25, 2015, 8:04 pm

Yes, because mass refresh will fix the problem with the site being down.

TerminalLance - April 25, 2015, 8:42 pm

Sometimes when i click on something it says i may be banned IP or ISp but then again if i refresh 5-6 times i can view the forum again? Just me or anyone else?

Sharjah - April 25, 2015, 8:42 pm

Issues with the site. You're good fam. Everyones gettin it

TerminalLance - April 25, 2015, 8:44 pm

Ok, thank you for the quick response! Was getting a little worried lol

Paradoxum - April 25, 2015, 10:41 pm

Hack Forums is now serving normally. ?
