Thread: [Looking for a microphone \(Voice over + Voice acting\)](#)

y0gurt - April 25, 2015, 9:34 pm

What's up ladies and gents,

I really want to get into voice overs and acting and I'm looking for some recommendations. I did my research on them, but it's always good to have someone who used the product to talk about it. I'm looking for something around 200 range, preferably cheaper. I'm willing to go little bit more expensive if the difference is big. Looking to hear back from you!

PS: debated between going here and Music, hopefully you guys can help me out

I use a blue yeti Microphone and it seems pretty good and is in your price range. Would recommend you to check it out!

Honestly, it's ish. I don't think that's a good transition from the cable it uses. CAn't remember the name. Wait XLR to usb is a cutback imo
