Thread: [Alphabet speed typer](#)

Josh? - April 26, 2015, 8:43 am

Quick program I made. The aim is to see how fast you can type the entire alphabet. My personal best is 3 seconds and 58 milliseconds.

To reset the timer, press enter whilst in the textbox.

Please let me know if you find a way to cheat the system.

Funny program, and you can cheat it by typing a and then pasting 'bcdefghijklmnopqrstuvwxyz' :P 0 seconds 83 milliseconds

EDIT: also just setting back the time on your pc: -1073 seconds, -937 milliseconds.

To fix this, use a stopwatch :D
