[Skid in question](#)

This user plans to steal HF member's accounts that use Bitcoin.
Here's how.

Spoiler ([Click to View](#))

(11:03:24 AM) GTH: How exactly are we going to do this

(11:03:37 AM) dop@lsd-25.ru: Okay, do you have any products for sale?

(11:03:42 AM) GTH: I will soon

(11:04:09 AM) dop@lsd-25.ru: Okay, so you are going to approach people asking them to sell X product

(11:04:10 AM) dop@lsd-25.ru: such as idk

(11:04:26 AM) GTH: Okay....

(11:05:06 AM) dop@lsd-25.ru: Then you are going to "teach" or let them get familiar with the program (Which then will have a FUD virus download and execute not right away to avoid detection)

(11:05:18 AM) GTH: Easy enough

(11:06:21 AM) GTH: And then?

(11:06:31 AM) dop@lsd-25.ru: We first, study them

(11:06:35 AM) dop@lsd-25.ru: we do not strike right away

(11:06:41 AM) dop@lsd-25.ru: we will install them on two - 3 rats

(11:06:45 AM) dop@lsd-25.ru: one of them could be yours

(11:06:48 AM) dop@lsd-25.ru: we study them, keylog them

(11:06:49 AM) dop@lsd-25.ru: etc

(11:06:54 AM) dop@lsd-25.ru: I use im3 and luminisoity link

Everything he did here on HF was money based and a bit shady if you ask me.

DO. NOT. UNDER ANY CIRCUMSTANCES CONTACT THIS MEMBER

Lifeless? - April 26, 2015, 1:58 pm

Lol, hes banned and repfucked. Thats pretty funny.

M E N A C E - April 26, 2015, 1:59 pm

thanks for the alert OP much appreciated.

@Lifeless, yeah they got him good haha

Stee - April 26, 2015, 2:01 pm

His being closed and repfucked for a while now never liked that user.

GAUTH? Just a mere guess. Have you ever added more points to your post just to get 35 characters?

NoodleBot™ - April 26, 2015, 2:50 pm

Good community alert. Nothing good ever comes from a username like that.

Nachfolger - April 26, 2015, 2:52 pm

I sent him my password. Is this a issue?

OT: he is banned and RF'd. I doubt anyone will contact him.

Eternal. - April 26, 2015, 2:54 pm

I do not think he will have much luck.

Post limit has been dropped over to 25.

As for Gauth it plays a small role but isn't the first problem they may walk into. Got random generated passwords, 2FA for every account, and I don't download anything from here on my gaming rig or laptop. Although if I lose my phone then GG lost access to my accounts for a few days.

Oh, it has? Haven't noticed. Also, seems very secure as long as you have a dedicated HF email which is only accessed from your phone.

He will and is striking. He contacted me after he was interested in fixing my PayPal issues (I had two PayPals limited, with amounts over \$1000+ stuck in them). He was interested in fixing the first PayPal for me, but then he ran a virus somehow on my PC. Later on, he closes my HF account because I'm not interested in doing any projects with him. He then helps me to recover my PayPal, but then I realize it was just for sniffing the email password that was associated with the Blockchain wallets, which was the most vulnerable wallets for BTC to be stolen. Then, I search for my second computer, and I notice he's already on my TeamViewer. I shut down Internet connection for the first computer, and I quickly recover all passwords and main accounts via my second computer. The next day, I recover all my accounts via the primary email, then I finally receive my HF account after 20 days.

Enough is enough, this guy is a PURE SCAMMER and will rip you off at any given opportunity. Do not deal with him at all
