Thread: [Nex is probably selling a public bot.](#)

Marquees Turing - April 27, 2015, 11:39 pm

I just happen to click a thread that was in the botnet section, well this one:

<https://hackforums.net/showthread.php?tid=4797452>

And in the OP there was a link to this: <https://hackforums.net/showthread.php?tid=4783709>

You guys can compare the design/features, just the panel looks revamped.
Thought I should let you guys know what is happening here.

Kudos to DangerZone90 for finding this.

Gary - April 28, 2015, 12:34 am

Literally everything on here has been revamped with a new colour/skin/source whatever

Lucifer Morningstar - April 28, 2015, 12:58 am

60% of the products on HF are revamped with a new theme yet they still sell it. Nothing new..

Nicholai - April 28, 2015, 3:49 am

Kinda how the most products here works.. They hire someone to C+P the source, then they resell it to someone else because they're "busy", next day they open another.

There really isn't any standards here, there needs to be.

Unfortunately true. Can proudly say have never done anything like this in my time on HF.

Kind of funny that Nex is a leader of a coding group and he's doing this though.

HIGH PAID FELLA - April 29, 2015, 4:53 am

A typical fucking piece of shit, sells a fucking public bot.

Raymond Reddington - April 29, 2015, 5:10 am

A member from debug and does that? SHAME

Minimal. - April 29, 2015, 10:37 am

Huh, amazing... It's literally the same with some new fancy design ?

Just in case he junks his thread: <https://i.imgur.com/JTVrQdE.png>

NTTITONV135 - April 29, 2015, 10:42 am

its funny because this works. The more stupid people you have on HF the more shitty products there are going to be. Simply because stupid people will buy them.

Nex+ - April 29, 2015, 2:03 pm

So you are calling me out on this because mine had similar features? Lets see some solid proof of me selling a public bot and than maybe open a community alert, because as far as I know you know nothing about my product or myself.

Marquees Turing - April 29, 2015, 2:05 pm

Please read the title, I said 'PROBABLY'.

Moreover everything looks same. Even the position of input boxes.

lol

And hey thanks for negging me douche.

Spoiler [\(Click to View\)](#)

?

Xepher The Cat - April 29, 2015, 3:24 pm

I love how the tab names are just different as well. Create executable/build, settings/config, users/panel.

iDuL - April 29, 2015, 6:16 pm

Well the thread was closed after this was posted. Job well done OP

Nex+ - April 29, 2015, 7:16 pm

It was closed because I sold it, I bought it to flip it and made my profit

Marquees Turing - April 29, 2015, 7:53 pm

Let me put it this way :

So basically you scammed ? Hmm.

We would probably see a scam report up on you if your buyer sees this or no since you are lying.

I wonder if that crypter of yours is copied as well. ?
