Thread: [\[EPIC\] RAT Pack 25+](#)

Messenger320 - April 29, 2015, 4:44 am

- This is a Rat pack I have created from some of the best rats cracked and from HF -
- There are over 25 RAT's in this pack -
- The File Is To Big For Virus Scan -

ENJOY!

Direct Download -

<http://www.mediafire.com/download/wkc2w3feoo5kovo/%7BRAT%27S%7D.rar#39;S}.rar>

- I Have Been Using Them For A Month Now And Decided To Share Them -

IF YOU REALLY WANT TO CHECK FOR A RAT THEN RUN IN A VIRTUAL MACHINE :D

Chopped - April 29, 2015, 4:44 am

Virus scan each file then! Haha, thanks for the share buddy.

Incendiary. - April 29, 2015, 4:51 am

Two things.

- Please upload a virus scan of each zip.
- Asking/hinting for rep is not allowed (so ive been told). I would recommend removing that if i was you :)

fenrir - April 29, 2015, 5:10 am

I don't get why people are saying to virus scan rats. I mean... What do they expect? It to not have detections? Test it in a VM if you want results.

Fr?sh - April 29, 2015, 5:13 am

You're not allowed to ask for rep or even hint toward rep

Also, download these with caution

Incendiary. - April 29, 2015, 5:22 am

Just a question, How is the PoisonIvy file only 2Kb?

Messenger320 - April 29, 2015, 12:24 pm

I have changed the post thanks for the reminder!

(Apr 29, 2015 05:22 AM)huntedx Wrote: [\[CITE\]](#) Just a question, How is the Poisionlvy file only 2Kb? I am sure when I downloaded it was full, my antivirus probably cleared it sorry about that. ?

AnOrdinaryGuy - April 29, 2015, 12:32 pm

Thank you man
very useful

Your welcome hope you enjoy!

ayyyyyyyylmao - April 29, 2015, 2:46 pm

Low quality spam posting, then to post a huge pack of RATS which is probably backdoored.

Be cautious when downloading or just don't download.

AGREED: Virus scan on rats is just stupid.

But the rats could all have another rat bound and crypted to them and we wouldn't know. Even testing in a VM as you suggested might not work, a smart person would code their trojan/rat to not execute if VM or sandboxie etc etc are detected.

imagine all parts (client and server) of each rat is infected you'll be spreading someone elses trojan for free what better way to get free bots than to give away free software that you infected LOL

now OP im not accusing you of doing this just trying to help educate the masses as i didnt have anyone explaining this type of thing to me 10 years ago and BOMBED my computer plenty of times grabbing software from the internet and running it.

post count doesnt show if you are hq or not

and why did you put blackshades in the rat pack
