[ThemeBase](#) // [ThemeLink](#)

Most controls has a Color property so you can change it easily.

To all ".NET PROs" : Don't bother complain about themebase, it was made to be used.
And at least I share. Smart ass.

I was about to say, why use the themebase :P
Anyways, good looking theme, nice and simple (:

Exeption™ - April 29, 2015, 9:13 am

Simple but Nice Theme, Good work :)

DannyTM - April 29, 2015, 9:54 am

hmm nice theme but do you even picturebox?

as if someone got dropped on his nuggin:

SaketSaket - April 29, 2015, 11:22 am

Nice & simple... nice to know that colour property is also provided... ;)

Are you looking themed picturebox?

Hopsin - April 30, 2015, 3:17 pm

Could you release some other colors as well? It would come in handy for many members. Thanks for sharing

Actually you can change the color directly from the "details" tab; tho if you need help just drop me a PM and I'll make it to suit your desire

Generals - May 1, 2015, 2:12 am

Nice design, i love your designs, dude. thanks for sharing it.

RealKiwi - May 2, 2015, 3:20 pm

This theme looks really great, good work. However you should add maximize/minimize buttons.

Thanks for the kind words ! :)

Maximize and Minimize button are binded into the ControlButton, [here is why](#)
