L33TPr0xY - April 29, 2015, 12:03 pm

i know its noting great but it is a start so here it is

[http :// i.imgur . com /fkkjECY .png](http://i.imgur.com/fkkjECY.png)

[http :// www .mediafire .com /download/ v69d7t293bgz8g1/ System+Info .rar](http://www.mediafire.com/download/v69d7t293bgz8g1/System+Info.rar)

Please Let me Know what you think ?

sorry for the space links i dont have 50 Post

Unturned - April 29, 2015, 12:04 pm

tl:dr

L33TPr0xY - April 29, 2015, 12:05 pm

thank you so much that helps a lot

Ninja - April 29, 2015, 12:13 pm

At least it is not a RAT or keylogger or calculator. Good job, OP.

Odus - April 29, 2015, 12:27 pm

Code TextBox1.Text = Environment.MachineName

TextBox2.Text = Environment.UserName

TextBox3.Text = Computer.Info.OSFullName

TextBox4.Text = Computer.Info.OSPlatform

TextBox5.Text = Computer.Info.OSVersion

TextBox6.Text = Computer.Info.InstalledUICulture.ToString()

Bar designing the form and setting the text properties, how much of this did you actually do?

Unturned - April 29, 2015, 12:33 pm

His first program has a theme, pulls system information, and uses timers. Curious, isn't it?

L33TPr0xY - April 29, 2015, 12:46 pm

I'm not a complete noob in vb I know how to use themes timers (exc...) I don't see the problem here.

Minimal. - April 30, 2015, 2:13 pm

Well you sure know how to use the My-Namespace...

Calm down Odus, I know this user IRL, he's just trying to learn and contribute...thats more than I can say for alot of the newer users. Cut him a break. ?

Vouch, L33t ? Good stuff.
