Thread: [Center Or No Center](#)

Lil Durk - April 30, 2015, 11:41 pm

Hey I know everyone hates my centering and I love it.
Shall I continue on or stop.
Will do what ever reaches 20 first.
GLWS.

Cooligan - April 30, 2015, 11:43 pm

I don't think anyone should center there posts.

Meh makes things cleaner.
Especially sales threads.

Grin - April 30, 2015, 11:44 pm

I think a knife should find its way to the center of your heart.

If you lent it a hand, it could.

You should change the poll to ask who wants you to stop breathing or continue breathing. That would truly be interesting.

Only got spoons my boy.
Mail me a knife and I'll kill myself after I kill Orchid's big ass.

Windows95 - April 30, 2015, 11:49 pm

Don't see the point in centering. Its a waste of time and a majority of people don't like it.

Ahri????? - April 30, 2015, 11:51 pm

Last time I check centering everything makes you look like a 10 year old using MS word for the first time.

Lil Durk - April 30, 2015, 11:54 pm

Or someone who just hit center.

Good try though.

Weaboos man.

I find that term very offensive to my people, please call us otaku

Skitzo. - May 1, 2015, 12:14 am

Idk I don't care about it.

Everyone complains if you don't use the standard font and the default left-align lol.

I've seen people bitch about all kinds of mediocre shit that really doesn't effect them, but they personally don't like it so they feel you need to change it.

Diabolic - May 1, 2015, 12:40 am

Why care in the first place? Stay doing you. It's irrelevant what other people say when it comes to personal preference.

Not really, I doubt much people care. Definitely not some yellows/queen shit

.Crypter - May 1, 2015, 2:45 am

I don't really see the point in centering your text, my eyes automatically scan to left to right so really pointless.

Thehackerguy1 - May 1, 2015, 2:46 am

Continue centering, i order continue, that is your specialty and that's what i like.

420 - May 1, 2015, 2:46 am

Do you think I should write like this? Anyway keep posting centered

Okay then why are you getting mad about it?

Not everyone on the site knows how2HTML

WZDY - May 1, 2015, 3:04 am

It's like writing in caps, it always gets more attention and it's pretty cocky from you (if you see it this way).

I understand you like things centered, I also like them more like that but centering in a forum is for sales threads to get more attention.

I mean Roger waters randomly came at me saying if I don't stop I'll get a warning level even though it's not in posting etiquette.

Then stop doing it? If you're gonna just stop doing it if enough people want you to, what's the point in doing it anyway?

I've always done it.

And just cause it gives me something to do.

Purest. - May 1, 2015, 7:02 am

It's literally Ctrl A + and a mouse click.

Not really a waste of time lol.
