Can you provide proof of purchase? No.

Can you get Sh1eld (or Abe, as Sh1eld's temp banned) to verify any purchase? No.

This kid is retarded.

What RDCA told about this guy is correct:

I'll be debunking these false accusations one by one.

The topics that you mentioned are wrong, you have not purchased the eBook at all. Stop sales trashing. This thread is senseless.

1. Proof 1

Keylogging is not even included in the whole eBook.

2. Proof 2

"Encryption has long been used by military and governments to facilitate secret communication. It is now commonly used in protecting information within many kinds of civilian systems."

This is not at all included in the eBook.

3. Proof 3

USB Password Stealers are not at all included in the eBook.

4. Proof 4

Bruteforcing is included, but the word "hydra-gtk" nor any other main elements of the page you provided is not included.

Why don't you provide proof of purchase? Simply, you did not buy it at all.
Stop lying.

Travs - May 1, 2015, 8:37 am

I mean what else could you really expect from these guys. They have no real knowledge of generating any actual income nor can they say they've barely skimmed the surface of what they're trying to sell to people. The eBook section needs to be purged because of wannabe marketing assholes and the cunt above me.

DamienVC - May 1, 2015, 8:48 am

What I see is that:

The word encryption is not there in the eBook

This paragraph mentioned "Encryption has long been used by military and governments to facilitate secret communication. It is now commonly used in protecting information within many kinds of civilian systems." isn't there in the eBook either.

Chapter 2/Method 2 isn't Keylogging

Keylogging isn't a method at all

The word keylog isn't in the eBook

The word USB or USB Password Stealers isn't in the eBook.

The 4th topic isn't USB Password Stealers

The 5th topic isn't Bruteforcing, it is the 10th topic.

The bruteforcing process does not enlist any programs, it just gives an introduction to bruteforcing, and Backtrack or hydra-gtk isn't involved at all.

===

I will be PMing the reviewer to tell his opinion, everything is over HF PM and I don't yet have the user on Skype either.
