Oh bloody fuck sake...

I just couldn't wait until I have 100 posts and by then either it won't be FUD anymore anyway... I've been looking for a free efficient crypter for ages now (yes I'm desperately broke)

OP pls :(((

This basically makes your virus/trojan/RAT/Botnet server fully undetected by anti viruses

Nikm - May 4, 2015, 8:10 pm

Thank you for this, ill post a vouch as well if i can get it to work. sending a pm now.

edit: most definitely works. antivirus cant find me... although, i did open my own file to make sure it works and i hope i didn't get infected with a secondary file from the crypter =p, but i trust RYA-249

Lets have a look then, see if it's any good :)

Nikm - May 5, 2015, 6:42 pm

I have a question about poison crypter. It works beautifully with crypting dark comet stubs, however, when i try to crypt a dark comet stub that is binded to a 6 mb program, the crypter just spits out a 0 byte file that does nothing. how can i get the binded file to be crypted?

note: in the process of crypting (after i select the file and save as the newly named file), the program first stops responding for several seconds before saying it was successful. which it isnt =p

note2: waiting a bit appears to do nothing either.

Thank you.

eidt: yeah, i'm using different programs to bind different rats stubs and programs... but poison crypter just spits out 0byte files

Gasmic - May 6, 2015, 12:12 pm

Big vouch for this guy!

Great crypter!

I've run into one small issue though.

Whenever my stub is run, my mouse pointer constantly is trying to load something.

This only happens once I crypt the file.

I've been trying to figure out what the file is trying to do.

DurpOut - May 6, 2015, 3:04 pm

Really nice crypter + free good support proof

Vouch for this crypter
to bad its not completely fud anymore.
But still very good for a free crypter.
Scan of my darkcomet server 7/35.
