Thread: [energ1zer's Primedice Add-On Suite](#)

e?erg1zer - May 3, 2015, 10:36 am

Just figured I'd post this here; could be useful to people who bet a lot on primedice like myself. If you have any other scripts or anything that you'd like to be added, feel free to let me know. All credit for the scripts themselves go to the original authors, paradocks and Serlite.

[Install](#)

Requires either Tampermonkey or Greasemonkey

Currently the functions it has are: Faucet timer and Convert bet amounts to USD.

Among other things, it has a live bet-to-usd amount converter, as well as a faucet timer.

All the code is publicly accessible, as I am hosting it on Greasyfork...
