So.. I have this shitty VPS, bought it for 10 euro and it has till the 18th this month, I am doing nothing on it, and I feel like I have to do something back to this awesome community. So the first Leet/Uber that reacts on this topic, gets it. I'll ask you to PM me and I'll send the login for the client area and the vps area.

Specs:

Ram: 1.99GB (sucks)
Bandwidth: 953.67 TB
HDD: 20 GB (sucks)

You got it. Thanks 'everyone' to participate LOL

Lifeless? - May 4, 2015, 2:58 pm

I'd take it but I guess its up to pysko. All I wanna do is run a league bot or something haha.
