Thread: [*Winner chosen!* \[AnimeFAN!\] 100% DDoS protection for your website \(L4\)](#)

Dragon. - May 5, 2015, 4:10 pm

I'm offering a free DDoS mitigation protection service to one person's website, free of charge.

It's literally impossible to down this protection with any layer 4 floods.

Layer 7 protection will be minimal to none, though (I can't afford to protect you forever for free). It's your responsibility to filter HTTP floods.

If it's illegal to host in the United States, I won't allow it to be hosted. (Sorry booters...)

Pick a whole number between 1 and 10. I'll draw once all 10 spots are filled.

Cheers.

This is really cool of you, I don't need it but out of curiosity is this a new business you will be starting?

Windows95 - May 5, 2015, 4:12 pm

7 wonder how you will do this OP

Angel Beats?? - May 5, 2015, 4:12 pm

Vouch for dragon. This layer 4 protection is second to none. Honestly you wont ever be downed via layer 4.

Nah. I wouldn't bother. Most people on HF wouldn't be able to afford a full blown protection solution.
