Thread: [Knowing iCloud security answers](#)

Grover - May 6, 2015, 7:23 am

If I know an iCloud accounts security answers is there a way I can find out the credentials without resetting the password?

Kdog - May 6, 2015, 8:19 am

Haha, You could possible link other emails to your target. Get in the email. Sometimes websites send passwords to emails. What i mean is. Maybe he uses the same passwords for all accounts. So if some website sent him his account info..You can try that. There are many ways of jacking accounts.
