FIXED AUTOBUY

Vouch:

(May 6, 2015 11:50 AM)Meerkat. Wrote: [\[CITE\]](#) Not a bad method. It's not extremely unique but it takes you through the method step-by-step. It would take a little while for me to setup so I wouldn't be able to guarantee that you make money from it, but it definitely seems reasonable and very easy to do. If you take action, you can easily earn back the money you spent on the e-book. You may want to go into a bit more detail in your thread for the requirements (that their PC will need to be on for 24/7 for them to maximise their earnings).

My "review" is honest and I don't exaggerate.

(May 7, 2015 08:25 AM)Avatar Aang Wrote: [\[CITE\]](#) Well I'm going to buy, I'll let you all know my review on it

So I just bought this, here's my review:

Grammar: 9/10

I saw a couple grammar mistakes, but it won't affect your overall comprehension of the method.

Layout: 9/10

The layout is simple, with the whole eBook consisting of 2 pages. I think that OP should've added pictures, but it's still decent nonetheless.

Ease Of Use: 8/10

The method is fairly easy to use. When first reading it, you may have some trouble understanding a few parts, but if you reread it and think about it you shouldn't have a problem.

Content: 9/10

The method in this eBook is pretty good. After the initial setup, it's 99% autopilot (you may need to spend 5 minutes a day on it, just checking up etc.). Personally, I think the method's a great way to make money on autopilot. It's not super original (I've heard of similar concepts) but it still works and makes good money.

Overall: 9/10

Overall, this method is good. Although somewhat lacking in originality, it makes up for that by being profitable and easy to use. Vouch for ?Brushes and Auto-Cash!

I'll take the vouch copy for this "#1 auto-pilot money making e-book" (if you want). Don't bother sending it to me if it's shit..

iampoor - May 6, 2015, 10:11 am

I'll take a vouch copy if you need to.

Hey, I got a question ;). What will be running on my pc (or vps if possible)? Will it be a bot? A crypto currency miner? Ewhore-omatic? Or something else? And how much would I earn per day/week/month if I set this up correctly? Thanks in advance!

Can't go to much into detail without giving out the method but you can use a vps if wanted and the money being made depends on how much you invest and how much time you leave your vps/pc running.

So for example if you buy say 10 \$3 vps's off of low end box you would be able to make more than 1 pc.

Smhhhhh_temp - May 6, 2015, 2:15 pm

-What methods are the payouts in?

-How often do you get paid out?

-Does this need any investment?

-How long does the setup take?

-How much do you make per day/week?

-Could this be run 24/7 on a VPS?

I may be interested if I like what I hear. Ready to buy it, just need more info

Thanks for the quick reply. Still a few questions though, is this 1 piece of software I run or do I use some imacros or other macro program? And how much money will I make with 1 good pc? ;)

Thanks!

Money really varies a lot with a good pc probably \$20 a day for 10 minute set up.

Its a 1 software a virustotal in the ebook.

I'm very interested :P so if I had 2 RDP's I could make \$40 a day?

The specs are decent. Just looking for an estimate, I'd honestly be happy making \$5 a day total with them combined
