Thread: [\[Tutorial\]Exonet online builder setup](#)

DangerZone90 - May 6, 2015, 6:15 pm

1. download panel: [panel fixed](#)
2. compile stub and upload stub.exe and stub.txt to yourwebsite.com
3. now edit the tohex.php like
4. now goto yourwebsite.com/tohex.php to get the hex and save the hex inside stub.txt and mysql like

finally build!

OrbitHacks - May 6, 2015, 6:46 pm

Would you care to explain in the bin file immortal crypter(4).exe ?

DangerZone90 - May 6, 2015, 7:09 pm

Ah, but may I ask what are you using inside of the screenshots?
(Mostly just hosting, looks like altermista to me)

notepad++ ? works great for whats needed and free

OrbitHacks - May 6, 2015, 7:24 pm

You forgot to remove your credentials for your SQL. Nevermind error in my head.

Fatal error: Call to undefined function hex2bin() in /membri/exowarfare/classes/class.build.php on line 85
Wat?

TheSocomj - May 14, 2015, 9:50 am

when the stub downloads and i run it nothing happens?

DangerZone90 - May 14, 2015, 12:57 pm

when you do compile did you change output from x86 to anycpu?

rudibeeby - May 22, 2015, 11:45 am

can someone please compile stub.exe and upload would really appreciate it...thanks

tiendat - June 30, 2015, 11:56 pm

how to compile it ??? i don't know, i'am newbie , some one teach me ?

Tennessee - August 20, 2015, 8:59 pm

getting 403 access denied error when building?

RockBeltHostLTD - August 21, 2015, 6:24 am

Thanks for nice tut men. Can you give me link to description of this botnet?
