The Last of Us - May 8, 2015, 4:30 am

Hey,

First off, I appreciate you doing this for the community and all members.
I came to learn hacking and learn alot of things.
And I did learn alot of things about hacking and that its not easy :D
I am now focusing on programming and leaning pentesting with Linux.

I would love to get L33T because people will take me more serious and I will have more features.
And selling something without being upgraded is hard without those features.
I am on this forum for almost a year now and in that time I mostly helped people with malware RATs
keyloggers.
I helped what to choose, setting up, what crypter to chose etc.

I dont think I 'deserve' this more then other members but I think complete new members with like 10
posts should not win this but thats up to you ofcourse.

Thank you for this giveaway and goodluck to everyone else!
