Thread: [I got stolen 9.8*** BTC](#)

Mr.BTC - May 8, 2015, 5:16 am

Well i do not know what happened but i got 2300 usd stolen from my blockchain.info wallet here's the transaction

<https://blockchain.info/address/122LdZSJcxKkUM4nUXUNtNLBRmKEa8TvZS>

Fuck i'm so pissed right now never gonna trust those fuckers again

Justin Timberlake - May 8, 2015, 5:34 am

Damn that's a pretty hard hit. You never should've kept such a high volume in an online wallet.

Unturned - May 8, 2015, 5:37 am

Its not blockchain fault, my friend keeps his >50 btc on blockchain always and never got problems, you lost maybe of RAT? keylogg? or else that got information from you.

HitSweMan - May 8, 2015, 5:39 am

Bad luck man! You got Ratted and a skid send all the money to his account :P
Im sorry for you

Adium - May 8, 2015, 5:43 am

The guy who robbed you must be pretty fucking happy :P

?WhatTheJoint? - May 8, 2015, 6:03 am

My blockchain got hacked too before a year I lost more then \$4500 in bitcoins , try to get over this..
:(

Honey Singh - May 8, 2015, 6:08 am

Use Btc-e
I have more then 60+ coins there ;)

Circular - May 8, 2015, 6:23 am

It shows 9.89 BTC withdrawn, but shows a 9.89 BTC deposit yesterday. Maybe someone was testing your wallet?

Mr.BTC - May 8, 2015, 6:25 am

Never gonna trust those fuckers again instead i'm using Bitgo a more secure wallet FUCK

Flaxpicker - May 8, 2015, 6:58 am

"Warning! this bitcoin address contains transactions which may be double spends. You should be extremely careful when trusting any transactions to or from this address."

You might want to contact Blockchain support and see if they can be of any assistance... maybe they withdrew the \$ for security reasons... idk

ANON.PURGED - May 8, 2015, 7:01 am

:O , RIP You got ratted / keylogged by skid .

I highly recommend you to use offline wallet like Electrum . Its better than online because offline wallets will make your responsible . But the disadvantage in offline wallet is when you loose your pc. then rest in peace unless you know the secret word, That features is in Electrum

severos - May 8, 2015, 9:02 am

Where you using double password with 2FA? probably no which is why it was relatively easy to RAT you and steal your money.

Unturned - May 8, 2015, 9:16 am

If some kid get his HF account hacked because he did not setup well security so what's the odds to have someone stealing your blockchain wallet without two factor. Don't blame them as fuckers. Clean your computer and setup better security.

Walt Disney™ - May 8, 2015, 9:36 am

This doesn't look normal to me...

OP, contact block chain, I guarantee they took the coins for security reasons.

Dave Skylark - May 8, 2015, 9:36 am

<https://blockchain.info/es/address/1CjLXBYhoS1WuarqgWhawnqrSi2SjgJv4u>

That's the address where the money is at now.

Dan. - May 8, 2015, 9:36 am

(May 8, 2015 09:02 AM)severos Wrote: [\[CITE\]](#) Where you using double password with 2FA? probably no which is why it was relatively easy to RAT you and steal your money.

If you're ratted 2fa isn't going to be much help.

HIGH PAID FELLA - May 8, 2015, 9:41 am

(May 8, 2015 09:36 AM)Dan. Wrote: [\[CITE\]](#) If you're ratted 2fa isn't going to be much help. 2FA with SMS/calling would help.

Fr?sh - May 8, 2015, 9:41 am

and this is why we dont get ratted kids

severos - May 8, 2015, 9:55 am

(May 8, 2015 09:41 AM)Asterea Wrote: [\[CITE\]](#) 2FA with SMS/calling would help.

Exactly, 2FA SMS/calling will help much, thief will need to steal your phone to pass it, and I doubt it'll be worth the time.

Dan. - May 8, 2015, 10:03 am

(May 8, 2015 09:55 AM)severos Wrote: [\[CITE\]](#) Exactly, 2FA SMS/calling will help much, thief will need to steal your phone to pass it, and I doubt it'll be worth the time.

No? You'd just need to send the money in the background as soon as they login.

hunkey92 - May 8, 2015, 10:58 am

Yo Yo Honey singh, is it really honey singh?

Bitcoin Life - May 8, 2015, 12:28 pm

Lol you think blockchain did this? They don't even have your password...

And you're moving to another online service? What a great decision!

ZuGgY - May 8, 2015, 12:42 pm

Recommend using an offline wallet. Never trusted online wallets.

???? - May 8, 2015, 12:46 pm

I always suggest you use a desktop wallet on a secure network. I use an entirely separate computer for my wallets. You should also have multiple wallets, one for public business and another for transfer/shuffling and a final for holding large quantity (LOCK IT). Also, if I were you id be trying to track down and see where these funds go. Keep an eye on the wallet daily for months.

White Light - May 8, 2015, 4:15 pm

This is why you enable 2FA to your phone. Expensive lesson, OP. Hope you learned from it.

Bigandrewgold - May 8, 2015, 6:05 pm

step 1, dont reuse passwords
step 2, enable 2fa

And now bravo, you wont have your money stolen. This is user error, not service error

Savoy - May 8, 2015, 11:07 pm

Someone tried to double spend??

?enpai - May 8, 2015, 11:19 pm

I would never use an online wallet for this very reason, just stick the original Bitcoin software.

Teh Afro - May 20, 2015, 5:19 pm

That wallet contains well over 500,000 USD, i'm guessing whoever stole them sold them to a well known broker.

Muggsy - May 21, 2015, 8:16 am

I still don't use BTC and seeing this enhances the probability that I will never use it.

Captain Steve Rogers - May 21, 2015, 8:39 am

(May 21, 2015 08:16 AM)Muggsy Wrote: [\[CITE\]](#) I still don't use BTC and seeing this enhances the probability that I will never use it.

Lmao why not use btc?

It was OP pc which got hacked that's why it happened.

Bigandrewgold - May 21, 2015, 12:20 pm

(May 21, 2015 08:39 AM)Joker™ Wrote: [\[CITE\]](#) Lmao why not use btc?

It was OP pc which got hacked that's why it happened.

because of the fact that theres no loss prevention. If i get a virus on my computer someone can steal the btc in my offline or online wallet with ease. And theres no way for me to get any back. If the same person steals my money out of my bank account theres a process for me to get my money back.

SIM-1589588 - May 21, 2015, 12:22 pm

with ease. And theres no way for me to get any back. If the same person steals my money out of my bank account theres a process for me to get my money back.

Wrong. You can use wallet like coinbase with 2 factor authentications or their mobile app.

Ps: I'm using windows and held over 200000\$ worth bitcoins in my electrum wallet without any extra security. I get over 5-10 Phishing/Java driveby/exploits in my mail daily.

Hash G. - May 21, 2015, 12:23 pm

(May 21, 2015 12:22 PM)J.P Morgan Wrote: [\[CITE\]](#) Wrong. You can use wallet like coinbase with 2 factor authentications or their mobile app.

(May 21, 2015 12:23 PM)Hash G. Wrote: [\[CITE\]](#) Yeah but you still can't get your money back.

Yes Of course once it's gone it's gone permanently.

If I hacked your bank account, sent all funds to mules in nigeria and asked them to withdraw funds. You won't get a penny back in your bank till all money is recovered.. maybe after several years investigation.

Bigandrewgold - May 21, 2015, 12:32 pm

What shitty bank do you go to?

Any decent bank will give you money back once they confirm it is stolen. You dont have to wait until it is recovered(since its usually never)

White Light - May 21, 2015, 12:58 pm

On all the agreements I've had to sign for credit cards, one thing relating to this has been consistent in them all. You're responsible for the security of your credit card. If someone steals your credit card, it's up to you to call up your credit card company to report it as stolen so they can freeze the account. If you don't do it within a certain period of time, the company is not responsible for whatever the thief managed to buy - you are.

Same thing here. There are plenty of options to increase security on your account, and yet the OP obviously chose to forgo them for convenience. No 2FA on an account with over \$2k? That's more stupid than setting your pin on your credit card to 0000. All it takes is one person with sticky fingers or, in the case of OP, just one skid with a keylogger to get all your money.

How old are you ? We are not talking about " decent banks" and not everyone lives in USA

PS: forget about my bank I have accounts in multiple banks, ask your bank if they provide

insurance for hacking etc or not. Billions of dollars got stolen and millions of dollars are getting stolen, do you think bank is going to cover all loss just because you couldn't keep your shit safe? It's not their headache. It's yours, they can only help you to get it back with the help of police.

Most banks are already using 2 factor authentication methods and several other restrictions to keep account safe.

Bigandrewgold - May 21, 2015, 1:11 pm

well no shit. If your card goes missing and you don't report it until a year later then you'll probably shit out of luck. But if you report it in a timely manner most credit cards have a program to reimburse you for fraudulent purchases

I'm older than you kid. And stop assuming shit.

Do your research, come back and then talk to me.

Right now you are acting like a "I know it all" ignorant lil kid whom I don't give a fuck to.

Oh if you have guts to prove your point transfer funds from your bank account to mine through vpn/vps and try to get it back by claiming it got hacked.

I'll give you 5 times more money if you can get funds from your bank in a week or I'll keep it.

Thank you for restating my comparison. That right there is a security feature that you can use to protect yourself from fraud. If you don't use it, then it's your loss. Same thing with 2FA. Sorry for OP, but there's plenty he could have done to prevent it.

(May 21, 2015 01:45 PM)Bigandrewgold Wrote: [\[CITE\]](#) Says the person who calls everyone who they disagree with a 'kid'

It's that simple. BTC, unlike digital fiat transfers can never be charged back, that's one of the main features it has. That's why you need to take steps to secure your account to prevent loss before it happens. If you don't take secure your account, no matter how much you lose, I can't help but think of you as stupid before feeling the slightest bit sorry.

Quote:[no im not, lol](#)

My mistake, was only looking at the quote of your post and it didn't include previous quotes.

I completely agree with you. 2fa is very easy to set up and use. I have it enabled on any service

where i have a significant amount of money. But using 2fa doesn't make it impossible for someone to take your coins, just makes it harder.

Nullware - *May 22, 2015, 3:01 pm*

That's a insane loss, wish you luck with recovering from that. ?

BITW - *May 23, 2015, 1:26 am*

I was ratted and lost exactly 11.35 BTC few months back.
