Thread: [Need a steam Stealer/General Password Stealer](#)

Sundance - May 8, 2015, 8:49 am

Hey HF so I need a Steam password Stealer/General Password Stealer as I already have 2 Clients/slaves who use steam, I currently am using NjRat,Thanks. ?

Preferably free, as I forgot to mention

Even if you get their logins, you need to bypass steam-guard, and in order to do that, you must log into their email, which 100% will log you don't use reverse proxy. Oh and not to mention if they set up a 2 step auth like cell-phone code your fucked.

If anyone finds a way to bypass all that, i am also interested as I also have a few accounts cracked :)

lavic2001 - May 8, 2015, 8:52 am

Buy luminosityLink. There is smart keylogger feature. You can read tutorial how to steal snn files automaticly. It also steal passwords automaticly :) BEst RAT

iHasSlowInternet - May 9, 2015, 6:05 am

Or you could simply take their ssfn files and config folder.
If you need any help, feel free to PM me.

Incendiary. - May 9, 2015, 6:09 am

I can bypass that pretty easy.
PM me

Waste of time, you cant hack steam accounts unless you make a phishing site with verifications.

i guess you're new here, wrong! you can't. even if you have a bot to auto login fast using that website.. ok you're logged in.. then what?

you can't take their skins or anything.

the only way to do this is to have an .ssfn stealer. it will scan the whole pc searching for that file.. once u get it.. you can take all their inventory and account.

if you have the.ssfm file, then you can remove his email + phone + everything.

but don't do that, just use steam desktop auth to accept ur own trade offer without he know.

i recommend selling them for btc instantly.

NYANxCAT - June 13, 2019, 12:32 pm

ok so, if you have a .ssfm stealer that steal any .ssfm file form the targeted machine and send it via mail to you.

download steam desktop auth: <https://github.com/JesseCar96/SteamDesktopAuthenticator>

next steam attach the .ssfm file with steam desktop auth and make sure to get ur victim's password though the keylogger that will kill the steam session so he will login again. (otherwise just reset it.. u already have steam guard access)/

next step when you login it will ask for steam guard.. that's why we need SDA, connect the .ssfm file and youll get the code.

after you login send all your victim's inventory to either csgomoney or tradeit or any website that will buy ur inventory for instant bitcoin.

then after u take everything. delete his .ssfm file from his pc and then change his steam password + email + number.. and now you'll have 50% to keep the account or not.

if he contact steam support then he might get back the account if not then youll own it forever and sell the games inside the account.

please let me know if u have any detailed question, i've done this many times.

Thank you for this information. I will do some penetration testing on my local lab to verify it. So all I need is to use filemanager to download this "ssfn" file in stream directory.

Redwolf3221 - June 13, 2019, 5:12 pm

i do not see how this will Bypass the Mobile Auth

Here an Steam Stealer

attach .ssfn file to SDA and youll have access to 2fa of mobile :)

IUL280y - June 13, 2019, 8:24 pm

If they have steamguard and 2FA this will make it much more difficult to hack the account but there

are ways to bypass these features if you have the time to hack that one person or multiple people, best thing to do is use a keylogger collect all passwords as necessary and go from there, hacking takes time.

I'm right now looking at steam desktop auth, and there's nothing about attaching a ssfn file.

Jervasio3 - June 27, 2020, 9:34 am

Use WinX stealer. It's a Steam stealer too. But i don't think if he can bypass Mobile Auth.

Blezebul - November 27, 2024, 3:30 pm

Nothing can bypass Mobile Auth, there is some methods but people who have them won't sell it to anybody

buunas - November 27, 2024, 8:59 pm

i approve off thsi mesaage guys
