You dont seem to have so much knowledge in coding. What program is the stub coded in and can you refud by your own? If not I would not recommend this product. Im not salestrashing just saying what have to be told. This product is resold and dont know if the current seller have any knowledge.

Choucroute - May 8, 2015, 10:58 am

How the Crypter was refud if I do not know the coding? Everything is written in vb.net.

DaPiranha - May 8, 2015, 11:06 am

Looks very similar to the Crypter below any reason why? Who is the coder?
