Thread: [Is there anyway to search for a user with special characters in their name?](#)

3Chains - May 8, 2015, 6:29 pm

Say I wanted to search for someone but his name is all special characters? Is it even possible without copying and pasting his username?

5chn4pp - May 8, 2015, 6:33 pm

depends on the character, you can search with this one below, that is common

Code

get on a pc and type alt + 0160 and you will see that special character.

Omniscient - May 8, 2015, 10:48 pm

To search a name you have to know the characters in the name.
