How to instant message me (FOR POTENTIAL CLIENTS ONLY): Spoiler ([Click to View](#))
[align=center]If you want to contact me privately, but do not wish to PM, please download [Pidgin](#).

First open Pidgin, and go to "Accounts" then "Manage Accounts". Add a new account with the "Protocol" as "XMPP" and the "Domain" as "exploit.im". Make sure to check the box at the bottom that says "Create this new account on the server".

Please also get the OTR plugin found [HERE](#)

Once you download it, you will enable it like this:

I will not chat with you unless you have the plugin.

Do not talk until a private conversation has been started using the plugin.

To add me as a buddy, you will need my XMPP: userhelp@exploit.im
Make sure you authorize me after you add me.

First after i d/l it it put about 20 files on my desktop so i put them all in one file but when i clicked on the pidgen icon it wouldn't open and said to re download it. I tried to uninstall and it wouldn't let me. So i went back to the site and downloaded it again. once again it put all the files on my desk top but this time it opened. i put the files in a single file and then it wouldn't open again so i put all the files back on my desk top and it opened. i then went through the steps to make an account and used the domain and protocol you said to use. now it wont let me add buddies. the button to add buddies is grayed out.

Huge vouch for Business, he does great work and fast too. You can rely on him

Smarty819 - June 28, 2015, 6:59 pm

I corresponded with Business and had a very quick response. I didn't know what to expect beside being able to run a RAT and basically roll up my sleeves and work on my own from there.

So the class (package 3) happened pretty fast (almost immediatly after the payment). I decided to trust Business (the class happens over TeamViewer) and for all I can say, it was well worth it. I am a very curious person and, in bad english, I asked a lot of questions. Well I can tell you that I've been answered, in a professionnall manner. Clearly and politely.

But, first, here's what I recommand you to do before taking the class :

- read about DNS (see the guide on dark comet from Business); He will help you out with it, even (I'm sure) do the whole damn thing for you but being aware of it is like going to a class ready (wich I haven't done many times...)

- if you don't buy the package #3 (which comes with a free 1 month VPN, and was delivered as promised), you should consider buying access to one. (take a look at 143VPN.com).

- think about getting a crypter (that's where I hit a wall). Since I took the class for educational purposes, I wasn't really thinking of buying a crypter. I figured that with what I wanted to do with my RAT, I didn't need one. I wanted to learn about RAT, maybe play around with it a little, but I didn't think of a strategy to get slaves. I told Business that I wasn't there yet and, instead of putting pressure on me, he offered me to have that part of the class when I'll be decided on a crypter. So big thanks for that.

Big vouch for his class. Now I've learned about setting my DNS, my VPN and how to operate my RAT.

He helped me set up everything and even verified what I already learned from different threads. Made sure I knew what I was doing and gave me great advice.

I still have some thing to learn from him and I'll comment back on the after sale support ! :)

but really, big vouch for Business, it was a pleasure doing business with him.

I was scared of getting ripped off. Nonesense. I got what I paid for and that, my friend, is what you should expect.

Now I'm off to have a good time. ?
