Strange, I have been able to resolve several users.

Keep in mind not all users can be resolved.

Can you give me an example user that you are having troubles resolving?

You can't resolve anyone with "Allow direct connections to your contacts only" setting enabled. As far as I know, there's no resolver out there that can at the moment. The more people that find that setting the better it'll be.

or ... Microsoft could just enable it by default. Not sure why they don't.

Yes, which is why I said "Keep in mind not all users can be resolved."

Microsoft doesn't want to because they want Skype to be p2p
