hey guys

i need your help in sending a fake email to someone
for example
i want use someone s mail to send to someone else

can yo plz help me

thnkssssssssssssssssssssssssssssssssssssssssssssssssssssss

This is very easily done. All you need is a email spoofer. One thing I've ran into is you can only send not receive. So lets say you email Bear@gmail.com and they email you back. You won't be able to read what they have sent. Hope this helps and good luck don't forget to use some simple protection like VPN.

AnonymousPlayer - May 9, 2015, 2:50 am

Like Redemption said you need an email spoofer and a disadvantage is that you can't receive emails.

This is the best option IMO: <https://www.mandrill.com>

Most Email spoofers block out certain words such as "hotmail", or "facebook" to prevent phishing and hackers, this one doesn't.

Also on most Email spoofers your email go straight to the junk folder on mainstream providers (Google, Hotmail, Yahoo, etc), however on this one, it doesn't.

Good luck. ?

thinksssss

guys yo r the best

cyphras - February 14, 2018, 5:47 am

Lots of people here linking to Mandrill, looks like it's paid though. Anyways, there is also Emkei.cz
