Thread: [GTA V Music Manager](#)

Hey all,

I was asked by a friend (who is very computer illiterate), To make a simple app he can use to manage his music for GTA V radio.

So I made it for him, Very simple app, just drag & drop music on it. Right click to remove.

Edit: Be aware there is next to none in terms of error handling, but its a source to so you can add/edit do what you like with it. :)

Seems like a nice release. Too bad that there is a horizontal scrollbar. It could be just me but I hate those. Nonetheless the app looks good.
