Thread: [\[HOT\]Procrypter revamp\(feedback appreciated\)](#)

Neroxan - June 14, 2010, 2:33 pm

Just a preview of a crypter Im going too be modifying. Currently has icon changer, file cloner, & EOF support, Ill be adding a lot more in as I go.

This is as good as the old runpe will refud, I use a new modified one on the FUD versions of my stubs that I sell.

I took another post of this down before as I was testing it and got no feedback but this one will remain if no one replies.

A/v scan of builder (if it was infected I wouldnt scan @ VT, 2 a/v detect file cloner module used as trojan)

how to preview with no image to view? people are not just going to download it and run it to see

what it looks like .. atleast i wouldnt

anyways dont name this hot as its just a preview, actual releases of it should be hot XD

drizzy_effect - June 14, 2010, 2:38 pm

Can you add a picture -thanks

Given the fact that there's no Image available for preview, I'll download and give It a crack on my test lappy, thus shall see what It has to offer. At work at the moment, so upon my arrival home, I shall delve Into It.

Cheers mate.

Let me know how it works out for ya. This is the runpe that you said ran on your 64 bit OS before. Im using a different one in the versions that I have for sale. Faster performance than this runpe & its FUD.
