Selling download service from sites like ge.tt to spread your RAT.

This means I will get a copy of your crypted file and SocialE. people to download it and open it.

However you're not paying me for installs nor how much people opens your file, you'll pay the ammount of times your file is downloaded.

The price is really low and you'll get high chances of people executing your file.

Price per download : \$0.05 BTC
(Crypting service: \$3.00 BTC)

Why am I selling this like installs?

Well you're actually buying "loads" but there's a chance that your "Load" won't be opened by the user :)

These "loads" are cheap and ALL YOURS, in any way I'll be binding my RAT/Bot to your file because this will end my reputation in this service and of course trigger more red flags at the time I'm spreading.

Your file will be spread WorldWide, you can't ask me to target any place.

Service agreement terms:
(If you consider buying this service then take a look at this)

You're allowed to spread ANY file you want, I'll get my hands dirty for you.
You're paying for how much people download your file NOT HOW MANY EXECUTE IT.
You can do whatever you want with your slaves, after you get an execution it's your issue.
You're NOT allowed to ask for admin rights on execution (This will fuck up every attempt to execute your file)
Your file should be crypted when sent for the service (I can crypt it for a fancy price 0/60)
After the ammount of downloads is completed I will stop spreading your file and you'll be messaged after the task is finished.

Vouch copy of the service has been asked by (Weliar

edit: don't trust that user

Vouch copy available. pm me for info

Open for sales.

Would like to receive a vouch copy. If works out I will definitely get more.

Edit: According to his report my stub was downloaded multiple times but install rate is low. User has my vouch as his download service definitely works.

Vouch copy was sent and service was finished, waiting for overtake review.

Will give one random last vouch copy.

You spelt Download wrong in your title btw. Glws either way

Linkin™ - May 10, 2015, 11:24 am

For all we know you could get people to download it 1000 times or use a vpn but not open it so your ToS will basically not work very well Imo as we can see the DL's on ge.tt.

SIM-2223238 - May 10, 2015, 11:26 am

I would like to have a vouch copy good sir.

I will SE people to actually open the file, and I'm waiting for vouches reviews of the execution rate, also if you do not find attractive my service, well you can still spread on your own and buy bots from HF fake botshops ?

Plus I won't waste my time on actually scamming people with this, I'm good at this and I can actually tell my clients what kind of loads they'll be getting. *Like if they're just pervs, gamers, USA loads, etc..

I like this idea, and it's really cheap. I'm going to save this link and come back later to purchase.

Auxil - May 10, 2015, 12:49 pm

Really neat idea, man. I am not really into RATting / botnets anymore, but this service is quite cool.

I support you, and wish you a good luck with sales.
I'll refer a few of my friends who RAT to you. :)

This guy is a Legit seller, I can recommend him

Guys if you are looking for a serious seller, dont hesitate!!

anteruzic1 - May 21, 2015, 11:20 pm

I'll get back to you posting to come back later

urbaninvest - May 22, 2015, 2:01 am

i'm interested in your spreading and crypting services, if you deliver good results, i am looking for a professional long term partnership.

kindly send me a pm when you are available, thanks.

lordnelsonii - May 24, 2015, 8:22 am

Hi, just want to remember you that until now I haven't get the slaves I paid 3 days ago!!!!

I would be happy if you could deliver what I paid for.

thank you

inkbird - May 24, 2015, 8:59 am

Has anyone used this service and can vouch? Spreading services always seem to fail and shut down when people start complaining

Seller - May 24, 2015, 10:15 am

"in any way I'll be binding my RAT/Bot to your file"

I think you have a typo there buddy.

Any chance you could share with us your average download:execution ratio?

FreeAnneFrank - May 24, 2015, 2:13 pm

Basicly your price is the same price people charge for each Install. Eventhough you are offering fresh clients we don't know if you are't just downloading the file by yourself 40 times and get 10 infections. I hope you get what I mean. I am not here for sale trashing but I dont think you can get a lot of sales with this business idea. Good luck with sellings anyways.
