Thread: [.exe to .docx or .jpg or .pdf](#)

advscan - May 10, 2015, 5:34 am

I heard A while ago that we can convert .exe to another extension .pdf or .docx or .jpg so anyone can help from where i can get this convertor and the most important thing that don't corrupt the original bin

trojaninjector - May 10, 2015, 6:36 am

i am also searching for something like this for spreading my rat but after converting its not working. best way is spoof your file

advscan - May 10, 2015, 6:38 am

they told me search in premium section i found office exploit v2 i need to spread my http bot dunno

Crory - May 10, 2015, 6:40 am

i think this is what you are searching for : <https://hackforums.net/showthread.php?tid=4713515>.

Regards,
~Crory ?

i need to know does this corrupt the file? or it will work 100% in spread

#Skyline - May 10, 2015, 6:49 am

Some exploits allows this.
And sometimes you gotta spoof the extension.

advscan - May 10, 2015, 6:53 am

what do u mean by "spoof the extension"

#Skyline - May 10, 2015, 6:58 am

You can spoof the extension but wont convert the file type.

And here is a simple .doc exploit tutorial. Which does change the file type, and enables marco's on a word document, to download & execute your file.

You can bind the exe file to a png file or docx file, you just need a nice crypter and a nice binder

advscan - May 10, 2015, 7:00 am

i have cryptex crypter but if i bind it with a jpg does also chrome and firefox block the .exe?

#Skyline - May 10, 2015, 7:02 am

Depends what the detection rate is.

If 0/35 or if the encryption is strong enough, it will easily bypass chrome and firefox.

And that crypter is a paid crypter, it is highly likely it will.

advscan - *May 10, 2015, 7:05 am*

i am waiting the update of that crypter and i will try bind with a photo the .exe to see the result
