Thread: [The Only REAL Method To Make Money With Yroo](#)

**Mr. Money™** - May 10, 2015, 5:51 am

This method gave someone to me and i made some quick money with it so i hope you will to. (I have the rights to share it.)

Don't know if this is posted already but yeah anyway enjoy.

Step1: [Register Here](#) (You will get instant points if you decide not to do by this link you will get 0 points)

Step2: Claim your treasure chest(s) and copy your ref link.

Step3: Download TOR or a VPN ([censored], Ultra Surf, Etc)

Step4: Paste your Ref link on various forums and also paste it in your new TOR browser

Step5: Make new accounts on your Ref link in Tor Browser. (By using a good email receiving website) NOTE: Fakemailgenerator does not work!!

Step6: Once you made accounts for like 1-5 hours go to your main account and open all treasures and claim your reward.

Step7: Profit!!

## TIPS & TRICKS

Try making a Imacro script to make this autopilot.

put "." randomly in a gmail adress counts as a new email but gets sent to the original account.

PROOF: Will post MORE later!

(I personally used some emails i had laying around so do not ask me about email receiving sites.)

**Mr. Money™** - May 13, 2015, 9:51 am

(May 13, 2015 09:40 AM)Tp-Sumins Wrote: [\[CITE\]](#) Do you have to confirm the emails for the new accounts too?

Yeaah but if you use a "." randomly in your actual email. You will get the confirmation emails to your own email. :)

**Tp-Sumins** - May 13, 2015, 10:13 am

It's not working for me lol I tried to put "." In my email put it didn't work.

i don't use a macro :P i do it manual

**SyntaxErrors** - May 15, 2015, 6:28 pm  
I have done this before using Tor Browser and the Gmail Dot Trick, but after days of doing so I got rejected for fraudulent activity...

What do you use?

I just used Tor Browser to sign up with a gmail dot generated email and repeated this process constantly.

I used ExploitN's gmail generator and it gets detected by Yroo.

Do I use a temporary email creator? Does it work for you?

**Mr. Money™** - May 16, 2015, 6:23 am  
I use the dot method but not constantly because it will be suspicious

**scarface5323** - May 17, 2015, 11:46 am  
i have two questions,  
first: do i have to open the confirmation email for each account,from tor?(same ip as registration) or i can open all the confirmation links at once?,so they track the created account ip or the confirmation ip? because if they see that i confirm all accounts from the same ip i will be banned..., secondly,do i have to choose at tor to use only u.s. proxy?

You will receive all the activation links at your main email (I suggest making a new one) and you can just do it on tor and you don't have to choose a specific server just normally use tor

probably yes,but do i have to open all confirmation links at once? or i have to restart tor every link that i opens?

Nah just keep for open! And every acc you make activate it and do again and again but don't spam too much in case you will get banned!

**scarface5323** - May 17, 2015, 1:12 pm

do we know the limit? is per day/per hour?

i have managed to create 840 accounts per day, with different us ip every account, and different gmail alias

i will get banned?

**Dustbin** - July 13, 2015, 2:22 pm

I made 55 referrals in the space of around 1 - 2 hours and cashed out \$8 all the emails were the same just added a different number to it. You think I will get paid I also used tor and changed the ip circuit after ever account made.

Well should be no problem. I had one account banned but cashed out \$32 again allready on another fresh account

**souto** - July 15, 2015, 7:07 am

After 3 weeks waiting I got rejected. I think it was because I logged in some accounts without TOR... Gonna try again next week.
