Thread: [\[TOTURIAL\] Webhosting site exploit.!](#)

IOI_IOI - May 10, 2015, 8:13 am

HELLO, I found an exploit for a website to get their paid hosting service for 0\$! it isn't that great but its cool. ?

Tools Needed:

Internet

Firefox Web Browser

Tamper Data (it's an addon for firefox)

Steps:

Step #1 Open up Firefox, you need to install the Tamper Data addon, search Tamper Data on google and install it then restart firefox it says to do so.

Step #2 Go to the website were going to this exploit on which is cpanel.hostinger.co.uk. Hey I tried this on a few other webhosts and it didn't work so not all webhosts will work using this exploit.

Step #3 Once logged in the cpanel hover over on Hosting in the red TAB Click + New Account.

Step #4 Now choose on the paid choices Premium, Business.

Step #5 Okay were kinda almost done Its now time to open the tool Tamper Data in firefox on the top left hand corner It says tools and find and click Tamper Data HEHEHE ? IT should open up a program on firefox don't touch it yet.

Step #6 Now were here... click on any billing cycle choose any :)

now its time to click start tamper on the program then click continue on the website it pops up click Tamper.

Step #7 Find period erase everything in the field then click okay. Keep clicking submit until you get to the next page then click stop Tamper in the program we don't need it anymore.

Step #8 FINAL STEP It will say invoice not found then reload the page click the red TAB on top again it will have your paid webhosting that we got for free. ?

So that's how you do it! I hope this helps.?

IDK - May 10, 2015, 11:47 am

This method is known as " Web Parameter Tampering "

In which attacked temper the request and manipulation the parameters exchanged between client and server in order to modify application data, such as price and quantity

Lyralei - May 11, 2015, 5:58 am

Any chances on the hosting getting terminated ? Probably high :/

Thanks for the tut though op :)

IOI_IOI - May 11, 2015, 7:28 am

Yeah wow thank you for doing that, I really appreciate it.

Lyralei - May 12, 2015, 3:14 am

Lol not sure if hostinger is mad or probably just don't care.

Gonna try putting something here and just run auto backup.

ale12386 - May 12, 2015, 4:32 am

Thanks for the tut op! Will try this later on. ?

Good Morning - May 12, 2015, 6:57 am

This really is useful. Thanks a lot OP!!

IM SORRY HOSTINGER. Please don't kill me.

BrokenMachine99 - May 12, 2015, 10:40 am

Yeah nice one. thanks for sharing. keep it up

Luc4s - May 12, 2015, 11:19 am

Isn't working anymore :(
"Invoice not found."

\$uicide - May 12, 2015, 11:30 am

(May 12, 2015 11:19 AM)Luc4s Wrote: [\[CITE\]](#) Isn't working anymore :(
"Invoice not found."

if you read what the tutorial says, thats what is supposed to happen. refresh a few times and go to home page.

IOI_IOI - May 14, 2015, 2:15 am

Iv also tried it on the ssl certificates and it works. To make it work instead of erase everything on the "period" box type in monthly and it will do it for free :) It says I have to wait 1 business day though I just tried it today im going till tomorrow.

It says this.

Data for Comodo PositiveSSL Certificate (sak0ya.zz.mu) has been saved. Please wait 1 business day for SSL certificate activation.

KaliKid - May 14, 2015, 2:20 pm

dude i fucking love u man if i was l33tor ub3r i'd plus rep u

schmidi000 - May 14, 2015, 6:24 pm

Wow, that's pretty cool, i just tried it and it worked :D

The_Messenger - May 18, 2015, 1:11 pm

Gonna try this on hostinger and lots of hosting service, then i will decide whether its working or not

d7mzx - May 18, 2015, 1:24 pm

Thank u for the totorial ..
vouch u

BLCKBRD - May 18, 2015, 2:03 pm

Vouch for this method, works like a charm. Anyone who knows other sites where this works?

SIM-2508228 - May 18, 2015, 7:00 pm

thanks for the share gonna give this a shot

So that's how you do it! I hope this helps.? For me this only worked with the free subdomain. when i tried to buy one through them it said period invalid

DisturbedInstance - May 19, 2015, 1:38 am

This is freaking amazing, thanks man tip

Michael J. Scofield - May 19, 2015, 2:25 am

thank you for this method!

btw, does this work on their servers aswell? ?

IOI_IOI - May 19, 2015, 3:10 am

(May 19, 2015 02:25 AM)Michael J. Scofield Wrote: [\[CITE\]](#) thank you for this method!

Um no this is the only website that I found this working on. Theres many more hosts out there but I am lazy to try it on many more.

Michael J. Scofield - May 20, 2015, 1:44 am

No what i ment is the servers they're selling on their site (hostinger).

IOI_IOI - May 20, 2015, 7:52 am

(May 20, 2015 01:44 AM)Michael J. Scofield Wrote: [\[CITE\]](#) No what i ment is the servers they're selling on their site (hostinger).

OOOO Wops, I misread it sorry. It doesn't work on their vps only on the webhosting. :(

Icyries - May 20, 2015, 8:02 am

not working for me i did all as you wrote but it didnt work for me :(

Dafuq - May 20, 2015, 8:07 am

i never posted here, and still I am subscribed to this thread? Weird af!

IOI_IOI - May 21, 2015, 1:33 am

They patched it. At least everyone who tried it before it got patched they still get to keep their hosts.

Jason Stattham - May 25, 2015, 10:05 am

When i do this it says "Period invalid" when i'm done.

Emilz - May 25, 2015, 11:04 am

Exact same happened to me

Period invalid...

ejshadow - May 25, 2015, 1:59 pm

it has been patched...ffs i didnt do it on time :(

blu3 - May 25, 2015, 5:03 pm

Ahhh seems they patched it -_-

Victor- - May 25, 2015, 5:06 pm

Patched probably as it says period invalid...

Good Morning - May 26, 2015, 6:28 am

Well it's patched at Hostinger, any other services where it could work?

cultis - November 7, 2015, 1:21 pm

I found a new exploit

However, they are now pending current registrations so it most likely will not work until they remove restrictions.[/color]

1. Register as a free plan
2. Sign up everything as you will normally, until you get to the last page and you are ready to click "order"
3. Press the Start Tamper button, then click order
4. Change the "Plan" value to 113

darkguide - November 8, 2015, 2:45 pm

Would it work here ? <http://www.talismanonline.com/purchase.aspx>

I tried once i got this message

http://www.talismanonline.com/skrill_finish.aspx?transaction_id=1511081358-421913&msid=8A3B91AB05AA636968C75D7CCFB7BEA2

but i get no codes :o

Anyone knows what am i doing wrong ?
