I'd love a vouch copy for TF2. (I'm approved for Ub3r).

Thanks.

Are you using node.js and also how long does this take, can you play and use ur steam as usual while the hours are boosted? Giving away more vouch copies? :P

vouch copies? :P

It is not node.js. You can play while it is boosting, it will take one hour per hour boosted because it is stored server side. 2 vouch copies have been given out.

We didn't end up getting it working on node.js.

I couldn't get it to work the way I wanted it to. It was using far too much resources (and a couple of memory leaks) and didn't have the features I wanted, so instead I opted to hire someone to make a non node.js solution that better fit our servers/service.

If you have any other questions feel free to ask.

There is no way to idle without logging in to your account, however, you may keep steam guard enabled to ensure that your account is secure and only being used on our secure server.
