Will it take 8700 hours to boost the game time to 8700 hours or do you have something that makes it go faster?

Cause else its 362 days of nonstop boosting...

The boosting is 1:1, so it will take as long as the package you select. To make it easy, our server auto detects when you aren't playing a game, and begins idling, so you can continue to use the account while increasing the hours played.

If i buy the 1 year package it will take atleast 2 years to get it done..

Are you sure you will still host this service in 2-3 years?

What kind of script do you use? Node.js? And do you sell the script?

You should also change the font, my eyes hurt.

Haha sorry. We were using Node.js, but it was using too many resources, so we switched over to a custom script. The custom script is not for sale, but we can install a Node.js script for you upon request.

That font is hard to read haha. Seems legit but I don't exactly know how this will make my account look better for trading.

Already bought this and its nice! already racked up proly 200 hours :D

lol - May 20, 2015, 10:18 am

How long would it take you to reach 8700 hours?

Basically this, it takes one hour to get one hour on steam, so to make it easy our server detects when you stop playing a game, and will begin idling, and then stop when you want to start playing again.

Just thought it was weird they had 3 threads... I am totally fine with some competition ?

fwedrick - May 22, 2015, 2:59 pm

Do you happen to sell any CS:GO accounts with LE or higher rank?

Haggo - May 22, 2015, 3:52 pm

Purchased the silver package, very fast setup and responsive support.

Thanks for the hours!
