Thread: [A few things to do after a Fresh kali install - Beginner](#)

Clon3 - May 10, 2015, 6:36 pm

Hello, I am going to show you how to set up Kali linux with some basic tools etc once you have a fresh install!

Update and upgrade if you have not already

apt-get update

apt-get upgrade

apt-get dist-upgrade

Change to the official repositories!!!!!! ## Regular repositories

deb <http://http.kali.org/kali> kali main non-free contrib

deb <http://security.kali.org/kali-security> kali/updates main contrib non-free

Source repositories

deb-src <http://http.kali.org/kali> kali main non-free contrib

deb-src <http://security.kali.org/kali-security> kali/updates main contrib non-free

open and install the i386 version of wine

Wine will have instructions but if you have trouble with the A64 version then just reinstall off there site.

Download and update your version of PHP so that you can run things like Metasploit Pro grabber!

If you are someone who uses metasploit then download the metasploit Pro Trial grabber here:

<https://github.com/kulisu/metasploit-pro-trial-grabber> THIS IS NOT PIRATING as it only speeds up the process of a free trial grab by using pre made emails etc.

The following are more of an option than a need. Assuming you followed my advice and installed wine, go to www.nirsoft.net and install some of the following tools:

Fast Resolver - Makes resolving large amounts of links a piece of cake, also has resumable sessions.

Web_Grabber - (the newer version may require wine) - This is a tool that once you gain access to something, allows you to snag saved passwords for most top browsers (Chrome, IE, Opera, Firefox) This is just a start, leave a comment/pm if any of you would like more

gizmodo - May 11, 2015, 1:54 pm

Here is the first comment change the blue to something readable color.

iSic_ - May 11, 2015, 2:02 pm

Agreed. The dark blue is a little tiring for the eyes.

Clon3 - May 11, 2015, 2:04 pm

Alright can do guys, sry bout that I like blue

HillaryClinton - May 12, 2015, 9:05 am

I didn't know about that trial grabber, thanks for sharing man!

Clon3 - May 12, 2015, 12:17 pm
