Not worth it tbh. \$5 is quite a bit for idle. Not trying to trash though, just recommending you lower the

price. GLWS ?

Now accepting CSGO keys as payment, add us on Skype!

**Syphonite** - May 10, 2015, 9:04 pm

I have a question, if i ordered the 4350 hour one, would i need to wait that long? or is this a glitch or something to speed it up. Because i don't want to pay now and have to wait like 2 months.

It would take as long as the package you purchased, the server automatically detects when you are offline, and starts idling, and then stops when you want to play a game. Thank you for the question

**Aiba** - May 10, 2015, 9:06 pm

I received a vouch copy, awaiting results.

Looks promising

Yep, unfortunately, there is no way to speed it up, as the time stored is server side.

Online and ready to take orders on skype and HF. Skype: weedybiscuit.

(May 11, 2015 02:26 PM)?StatTrak Wrote: [\[CITE\]](#) Am I able to turn my PC off and the time will still

rack up?

Yep, the account idles on our server and will detect when you aren't playing a game, and then begin idling on our server, so you can turn of your computer.

What information will you need from us?

We do need to log in to your account, but you may keep steam guard enabled so you can ensure the only thing that uses your account is the idler. So, we still wouldn't be able to log in so you can be sure it is secure.

Well if you accept Paypal, that's what I'll be interested in paying with.

Inbox me? :)
