Thread: [Macbook Internet Speed SLOW](#)

Orchid - May 11, 2015, 8:59 pm

My MBP (Macbook Pro) is super slow, my PC is running fine, like the internet speed is 50/mbps but this MBP won't even load google.com

I have the 2015 MBP and I need help fixing this as I know nothing about Macs.

The speed is fine on my PC

clark.dll - May 11, 2015, 9:03 pm

When you say "Macs", are you referring to the popular yet unhealthy burger from McDonalds?

Muggsy - May 11, 2015, 9:03 pm

could be the stack of pizza boxes thats blocking the signal to your wifi

Apostle - May 11, 2015, 9:04 pm

Are you sure that its not the wifi speed at McDonalds?

The speed at which your heart beats isn't though

Fat contains estrogen cells which is the most dominant female hormone. Apple sensed you spontaneously grew a vagina and are simultaneously blocking you from the Mac Master race.

You guys are all super dicks...Why the fuck would you mess with this dude when he clearly needs help.

Dude Do this:

- 1) Open the mac up with 8tm screw-driver (can be found at walmart) and check for Sun chips inside it.
- 2) Move the foil paper from your router from the left over pizza boxes
- 3) Jack-off
- 4) Break your mac and buy a new one...Apple Logic
