Thread: [Scammed #DOPE uid=2210153 | MaskedCrypter](#)

Geo Trouvetou - May 12, 2015, 9:35 am

Hello everyone,

If i do this post today it's because i need to be refund.

It's was not a really scam but i buy MaskedCrypter to #DOPE 9 May 2015 and i need to be refund, why ?

Thread: <https://hackforums.net/showthread.php?tid=4770371>

Proof: <http://image.noelshack.com/fichiers/2015/20/1431448362-proof.png>

In the TOS it's say no refund, i know, but it's already say that his crypter work and is 'FUD'. Which is the case of neither:

License problem

- <http://image.noelshack.com/fichiers/2015/20/1431376904-photo.png>

And the only time is worked, it's was detected by 4 AV's (+Qihoo TS):

- <http://fuckingscan.me/result.php?id=194759>

And the file (darkcommet server) doesn't work after crypting.. (and no, i've not clicking .NET support like you say me in PM, lol)

So, this is why i need to be re fund.

I hope you understand, specially you #DOPE. You need to sell your products only when they work. (sorry for my bad english)

Cordially,

As stated on thread project is inactive for around anther weeks, got serious exams going on right now, can be confirmed with most people in the UK if you wish. Anyways, claims it don't work on DC, when it does, tested on DC tons of times now claimed that it doesn't. On thread it states it is inactive for now, and that all subscriptions will be reset.

Bye.

Im with dope on this one...

exams are important... be patient

Bye.

Don't think dope would scam. Good luck nonetheless.

Geo Trouvetou - May 12, 2015, 10:42 am

Like i say, it's was not a really scam complaint.

I buy him product and after 3 days it's don't work and i find normal, that, the trader refund people buying his product.

Why sell his product in these circumstances? It is mislead consumers into error.

More and knowing that even though (strangely) it works with DC, it none the less it is detected.

So now instead of saying "Bye", be a good trader and make a move; and please, deletes the purchase link for potential buyers, when you know that your product don't work.

Thanks.

EDIT:

I also want to say that i have been contacted by #DOPE that the error had been repaired.

Which of course was not the case.

OP,

I hope you can resolved this with Dope, but it seems you have broke a rule in his T.O.S.

- Only scan on the following sites:

<http://nodistribute.com/>

<http://scan.majyx.net>

<https://razorscanner.com/>

You stated you had scanned it with :

Yes I can confirm that there very important exams approaching!

Geo Trouvetou - May 16, 2015, 10:06 am

Hi,

He offers a product that does nothing of what was expected, and I'm not the only one to complain.

Go to the thread: <https://hackforums.net/showthread.php?tid=4770371>

Reread the previous messages,

This does not concern me, when we know that we have to make revisions we do not engage in projects like this.

If it is to increase the number of your posts, no need to answer.

He continues to sell licenses while its product does not work and you find that normal.

How much does he pay you to be so blind?

Must we are a UB3R or whatever to get support?

SprayPaint - May 16, 2015, 12:00 pm

This sounds a lot like this thread:<https://hackforums.net/showthread.php?tid=4820906>

In his TOS he states no refunds and by buying it you are agreeing to the no refunds policy, meaning he is not entitled to give you any sort of refund.

Geo Trouvetou - May 16, 2015, 3:50 pm

So if I understand correctly, HF users can fuck other in this way.

Now, it only needs the creation and sale of a book advocating the abuse of 'ToS', lol. (it's a joke do not start to get excited.)

Although, i do not expect me to be repaid in this case.

However, and for the second time, i insist once again that the purchase link is removed from the article, knowing that users continue to buy his product and get fucked. (All you need is to read the last comments.)

Oh and I repeat once again, for those who want to defend him because of the fact that it have exams: I do not give a fuck.

It is for him to know how to manage his schedule, and not to us to assume his mistakes.

Have a good day.

Geo Trouvetou - *May 20, 2015, 9:15 am*

I see, nobody give a fuck.

You're a con man #DOPE.

I wish you all the evil in the world.
