Thread: [Cloudflare blocked when trying to edit and save my thread](#)

Dmitriy - May 13, 2015, 12:38 pm

I live in US, I am able to browse everything, but when I edit then save a thread or post, I get blocked by cloudflare.

What does that supposed to mean? It keeps on going back and forth while I am still able to browse HF.

Spoiler ([Click to View](#))

Thanks!

Thanks buddy!

It let me edit on the different network

Np. Not a big tech guy here when it comes to the cloudflare and stuff but I know they are doing some changes so that could be whats making it difficult for you.

(May 13, 2015 12:46 PM)xadamxk Wrote: [\[CITE\]](#) I had this problem for about 12 hours one day until I finally realized I should clear my cache.

So clear your browsers cache and see if that helps.

Well it was on the browser that I never visited HF. It's at college while I was VPN's to my home network

Dmitriy - May 13, 2015, 12:54 pm

(May 13, 2015 12:52 PM)xadamxk Wrote: [\[CITE\]](#) Strange. Maybe it's because of the VPN then.

It's OpenVPN, I VPN to my home network in order to access my servers that are at home. That IP is the same that my home network is at which isn't blocked pretty strange. Especially that it hadn't blocked the whole page

Omniscient - May 13, 2015, 12:54 pm

Your post contains code that is likely getting flagged by CF security.

Have you tried to do a full edit? The problem is more common with quick edit I believe.

Have you tried to do a full edit? The problem is more common with quick edit I believe. I believe I was in full edit. Now it works, pretty odd. Guess maybe it was because of the code. Thanks!

Edit: guess it was with quick edit. Just got same message on cellular so it got to do with the code
